

ASSEMBLY GUIDE

150mm WINE Rack

Panels

- 1 x **1** Top Panel
- 1 x **2** Base Panel
- 1 x **3** Back Panel
- 2 x **4** Side Panels
- 5 x **5** Fixed Shelves

Hardware

- 8 x **A** 
- 8 x **B** 
- 8 x **C** 
- 20 x **D** 
- 4 x **E** 

Tools Required

- Cross Head Screwdriver

- Drill & Drill Bit

- PVA Wood Glue

- Spirit Level

- Pencil

Before you start . . .

WARNING: Installation should be performed by a competent person only. This product could be dangerous if incorrectly installed. Check the pack and make sure all the components are included - if not, call the Manufacturers' Helpline on **01769 575500** and their team will get things sorted. When you are ready to start make sure you have the right tools to hand, plenty of space and a clean dry area for building. Don't rush, read the instructions first and run through the sequence before you begin. Assembly should be done in the stages shown in the following diagrams, constructing **one** unit at a time and keeping fittings together to avoid loss. Lay large panels on the floor using the packaging for protection. Do not over tighten screws.

Cleaning - Use mild soap and water only. Do not use abrasive cleaners.

 Video assembly guides can be viewed at www.mycabinetguide.co.uk

- 1** Screw 4 cam studs **A** into one of the Side Panels **4** as shown.

- 2** Insert 4 wooden dowels **C** into the same Side Panel **4** as shown.

- 3 Insert 10 shelf support studs **D** into the same Side Panel **4** as shown.

- 4 Prepare the second Side Panel for fitting by repeating the steps used for the first Side Panel. Refer back to Steps 1 to 3.

- 5 Insert 4 locking cams **B** into the holes in the Base Panel **2**.

Ensure that the arrow on each cam points towards the hole in the outside edge.

- 6 Prepare the Top Panel in the same way as the Base Panel by fitting 4 locking cams **B**. Refer back to Step 5.

- 7 Apply a small drop of glue to the 3 dowel holes in the edge of the Base Panel **2**. Connect the Base Panel to one of the Side Panels **4** - ensure that the panel grooves match up. Secure the panels together by tightening the 2 locking cams **B** with a clockwise turn.

Repeat the sequence to attach the Top Panel **1** to the same side panel. Remember to apply glue to the dowel holes.

- 8 Fit the Back Panel **3** by sliding into place within the grooves.

Run a small bead of glue along the grooves in the fitted Side Panel, Base Panel and Top Panel

- 9 Attach the second Side Panel **4**. Once again, remember to apply glue to the dowel holes and panel groove. Tighten the 4 locking cams **B** - 2 on the Top Panel **1** and 2 on the Base Panel **2** - once this Side Panel is flush to the unit.

- 10 Place the unit onto its base and slide each of the 5 shelves **5** into place.

JOINING CABINETS

This wine rack may be joined to a second wine rack or a cabinet in either a horizontal or vertical arrangement.

If joined vertically, it is recommended that the combined units are secured to the wall for extra stability. Wall fixings are not supplied with this pack.

Adjacent cabinets should always be connected together using the fixings supplied and as described below.

Joining units together will require 2 people.

Joining Horizontally

Choose 4 of the pre-drilled system holes in the cabinet side panel to use as fixing points. 2 near the front edge and 2 near the back.

Avoid the holes that will be used for shelf fixings and check before drilling that there will not be a clash with the fixed shelf positions in the wine rack itself. Use a spirit level to double-check positioning before drilling.

Secure the cabinets together using a pair of male and female connecting bolts **E** per drill hole.

Use a 5mm drill bit to drill through these 4 holes; continue right through the panel of the adjacent unit. Take extreme care not to push out the surface of the adjacent cabinet panel as the drill tip emerges.

Joining Vertically

Follow the joining sequence above. However, you will first need to mark the positions for the connecting bolts in the underside of the Top Panel of the lower wine rack or cabinet - there are no pre-drilled holes.

Notes
